01 Setup test & workout

QUICK & EASY SETUP

Quick start with our workout templates library

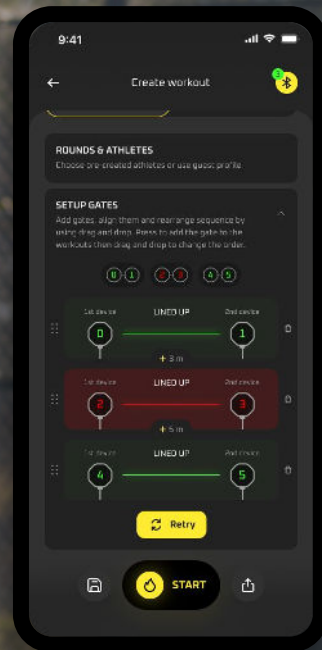

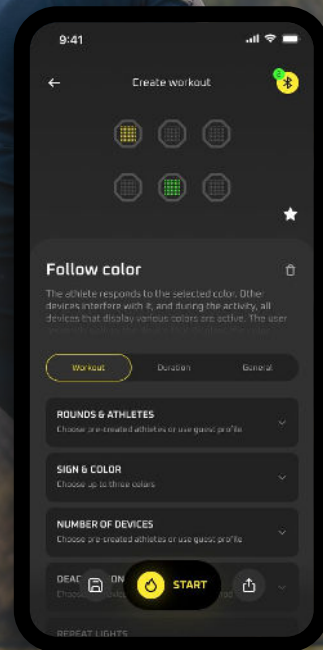

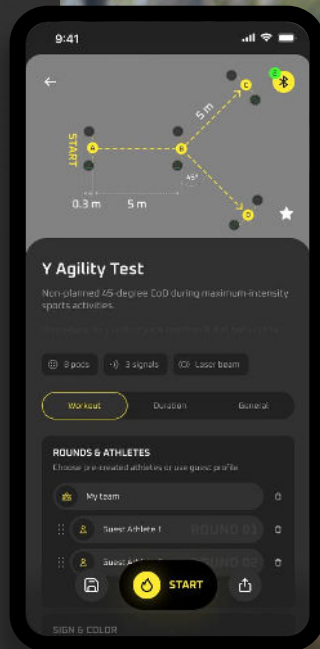

Customize workout with infinite config options

Set up polygons within minutes

Combine pods with all sports accessories

02 Live workouts

INSTANT RESULTS

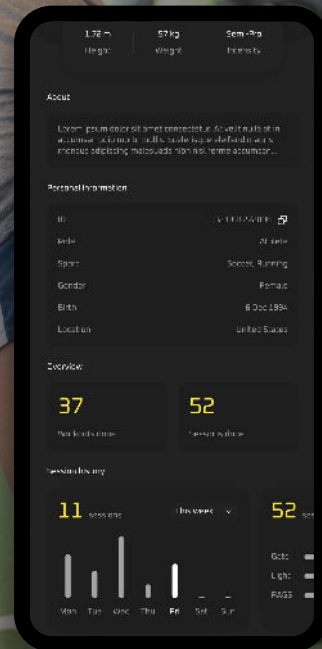

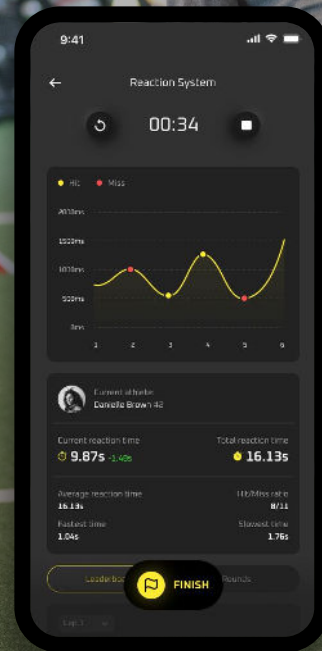

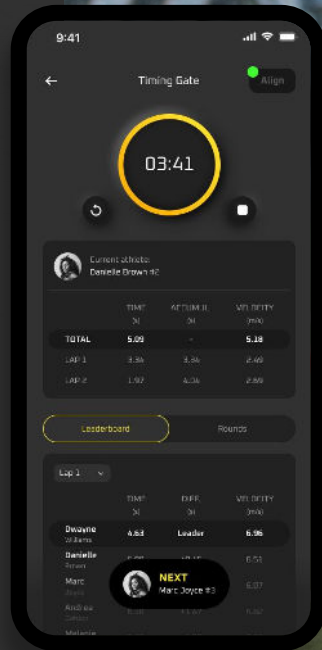

Gain precise athletic performance insights

Rearrange athletes EVEN during the cycle

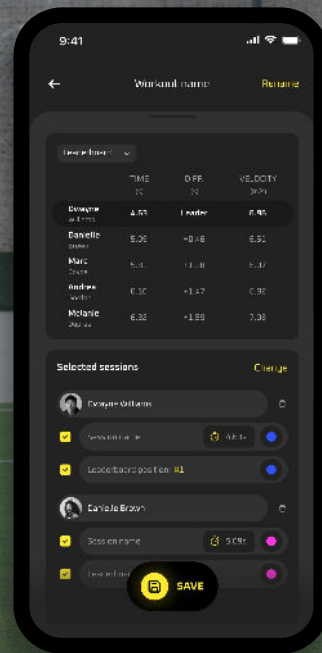

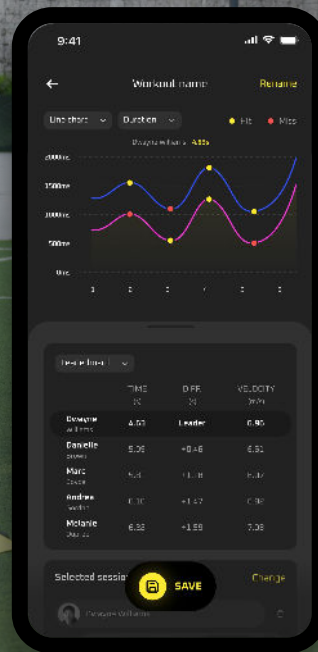

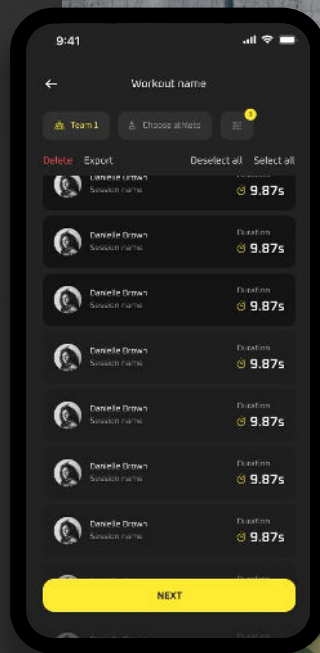

Build competitive spirit with live leaderboard

03 Data analytics

DATA BASED DECISION MAKING

-  Track individual athlete progress over time
-  Compare across location, team, or group level
-  Share results with athletes, parents, and coaches
-  Export data and build database
-  API integration with 3rd party software

Smartphone screen showing a table of performance metrics. The table lists athletes with their names, positions, and various performance metrics. A yellow 'SAVE' button is visible at the bottom.

	TIME	D.F.F.	VELOCITY
Evgeny	4.55	1.40	0.95
Canelle	5.06	+0.46	0.91
Marc	5.13	+1.18	0.87
Andree	6.10	+1.47	0.96
Molatie	6.38	+1.89	0.98

Gates setup in 2 minutes
using 7-yard pod-to-pod laser beam.

Most advanced cognition
with 100+ signs & detailed config.

Sales brochure

Joel DeMarco

Senior Associate Director of Olympic Sports Performance
UConn University of Connecticut

The product practically markets itself. Timing gates, just one component of the Sportreact, are a revolutionary addition to the market and has already exceeded our expectations. The reaction system is a cherry on the top!

Satoshi Takano

Co-Founder & Head Coach
ReactForge & Cognitive Performance Institute

Compared to others, I value its simple drill setup and versatility. Collaborative tech updates and openness of the team to user feedback are great. I'm thinking of switching my gym's systems to Sportreact and investing in the company.

Sanela Kunovac

Head Tennis Coach
UPENN University of Pennsylvania

I spot a significant tennis opportunity that could expand to other collegiate verticals as well. I would use it for internal athlete testing and monitoring. Additionally, I see the next phase involving the creation of data benchmarks.
